

COVID-19 Pre-Entry Notification Form

Warn workers with symptoms and other COVID-19 risk factors not to enter your workplace.

Posting a notification like this warning people with COVID-19 symptoms or other risk factors not to enter your workplace can help protect those inside from being exposed to the virus. Caveat: This form is based on public health guidelines in effect on December 22, 2020, which are subject to change at any time and may vary by jurisdiction, particularly with regard to the travel item listed first. Thus, in some jurisdictions, the risk factor is not travel outside Canada but travel outside the province. The list of symptoms is also apt to change as the situation evolves and more is learned about COVID.
