

# STAT Holiday in Alberta – Exceeding Standards

written by Conner Lantz | November 20, 2018

Looking at creating a policy that exceeds standards when it comes to STAT pay. The new change to Employment Standards that pays out Stat Holidays according to a calculation over the previous 4 weeks is hard to explain to people and not easy to administer either. Looking to create our own policy that meets or exceeds standards without having to do the calculation, but rather makes it a simpler process. Any ideas?
