

# Warehouse Temperature

written by hri\_Admin | February 20, 2019

Are there minimum temperatures for warehouse locations in Ontario? The ESA states: "In a health care facility or an industrial establishment, such as a factory, store, shop or office, the [regulations](#) set a minimum temperature of 18 °C, subject to some exemptions for things like work outdoors or in freezers....There are no set minimum or maximum temperatures for other workplaces."

Would a warehouse count as a factory or shop?
