How to Protect Your Company from Legal Risks of Workplace AI Use

The Promise of AI and LLMs

ChatGPT (GPT stands for Generative Pretrained Transformer) is an example of an AI product referred to as Large Language Models (LLMs), aka, "chatbots." After being crammed with massive amounts of data, LLMs are trained, i.e., programmed via algorithms to interact with human users, follow instructions, identify and learn from their mistakes. An LLM is a real-world HAL, an AI language platform that users can converse with and instruct to perform certain tasks. And that can be extremely
