QA Tester Job Description

QA TESTER RESPONSIBILITIES INCLUDE:

- Reviewing and analyzing system specifications
- Executing test scripts and reviewing results
- Reporting and documenting technical issues

JOB BRIEF

We are looking for a QA Tester to assess software quality through manual and automated testing. You will be responsible for finding and reporting bugs and glitches.

In this role, you should have a keen eye for detail and excellent communication skills. If you are also competent in executing test cases and are passionate about quality, we'd like to meet you.

Ultimately, you will ensure that our products, applications and systems work correctly.

RESPONSIBILITIES

- Review and analyze system specifications
- Collaborate with QA Engineers to develop effective strategies and test plans
- Execute test cases (manual or automated) and analyze results
- Evaluate product code according to specifications
- Create logs to document testing phases and defects
- Report bugs and errors to development teams
- Help troubleshoot issues
- Conduct post-release/ post-implementation testing
- Work with cross-functional teams to ensure quality throughout the software development lifecycle

REQUIREMENTS

- Proven experience as a Quality Assurance Tester or similar role
- Experience in project management and QA methodology

- Familiarity with Agile frameworks and regression testing is a plus
- Ability to document and troubleshoot errors
- Working knowledge of test management software (e.g. qTest, Zephyr) and SQL
- Excellent communication skills
- Attention to detail
- Analytical mind and problem-solving aptitude
- Strong organizational skills
- BSc/BA in Computer Science, Engineering or a related field
